

QUARTERLY INDICATORS AS OF JUNE 30TH, 2023

Casablanca, August 31st, 2023

- ▶ **Steady supply of the national market with sugar due to the industrial performance of the Casablanca refinery.**
- ▶ **Slight increase in national market consumption coupled with a decline in export sales.**
- ▶ **Progress rate of the sugar campaign at 62% as of June 30, 2023, compared to 77% as of June 30, 2022.**

OPERATIONAL INDICATORS 2023

The beet campaigns commenced as planned at the beginning of the second quarter of 2023, despite challenging climatic conditions. Indeed, the lack of rainfall and the very low water dams levels affected the growth of sugar beets.

The progress rate of the sugar campaign stands at 62% in the first half of 2023 compared to 77% in the first half of 2022, due to the rainfall recorded in May.

The strong mobilization of all agricultural partners, the support from the agricultural upstream team on the ground, and the support from central and regional administration have helped to partially mitigate the effects of difficult climatic conditions.

| In M MAD | Q2 2023 | Q2 2022 | H1 2023 | H1 2022 | Var (%) |
|------------------------------|---------|---------|---------|---------|---------|
